## APSCUF

Association of Pennsylvania:

I am writing to express our organization's support for our Union brother's and sister's as you fight for your futures and the quality of life for your families, and to provide the best education for every student at every state University. Pennsylvania State Education Chancellor, Frank Brogan is another, in a long line of others in a position of authority that continue to attack Union Worker's across this country and want nothing more than to break your Union. As a fellow Union, we here on Long Island New York, representing more than 300 active and retired Police Officers extend our support. We send our strength and fellowship as you fight to maintain and improve the conditions of your employment, for the betterment of your families and the many students you strive to teach. Every student at every State University deserves the best educators so that they can maximize their academic careers and future. We support every one of those students in supporting your Union.
